

Energy Efficiency (EE) Product Registration Database

- Lancerlot Riyano

PRESENTATION OUTLINE

- 1. Overview of the NRCS
- 2. What is the EE Database?
- 3. Product categories covered
- 4. System architecture
- 5. Key benefits of the system
- 6. Practical examples
- 7. Closing remarks

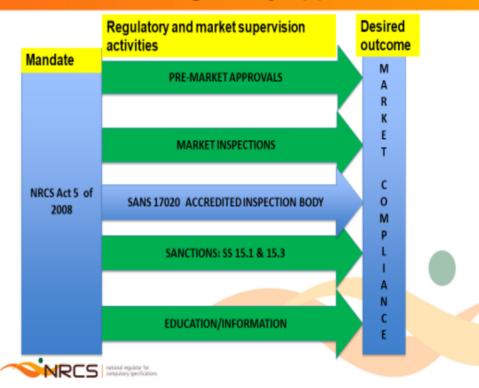

1. Overview of the NRCS

Quality infrastructure lattice

Overview of regulatory approach

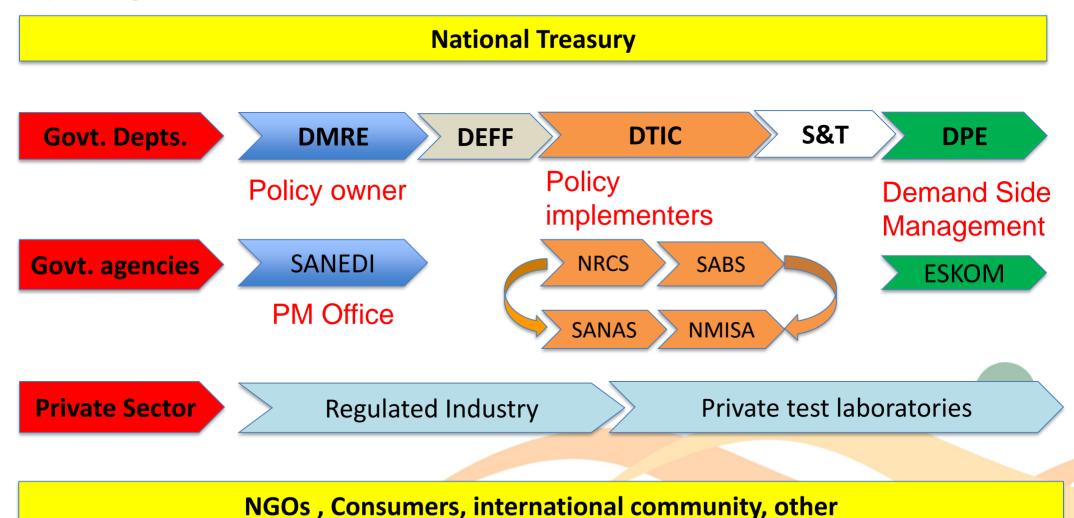

- System of interrelated mandates with reciprocal and pooled interdependencies.
- NRCS occupies the regulatory function in the QI lattice, operationalizing EE Policy by implementing and administering energy efficiency technical regulations.

Overview of the NRCS: S&L program context

Key program stakeholders

2. What is the EE Database?

An online system through which applicants can apply for EE Letters of Authority (LOA) to sell regulated electrotechnical appliances in South Africa

https://www.applianceregistrationdatabase. org.za/

- Full implementation from 1 April 2021

Global best practice

- EU: EPREL Database
- Australia

3. Product categories currently covered

VC 9008: Electrical and electronic apparatus

12 products categories

- Air-conditioners
- Refrigerators/Freezers
- Audio Equipment
- Set Top Box Decoders
- Clothes Washing Machines
- Tumble Dryers
- Dishwashers
- Televisions
- Electric Ovens
- Video Recording Equipment
- Washer Dryers
- Multifunction Equipment

VC 9006: hot water storage tanks

1 product category

Water heaters (geysers)

4. EE database architecture

THREE PORTALS

1. REGULATOR

2. APPLICANT

3. PUBLIC

- Evaluate evidence of conformity
- Make and communicate regulatory decisions

Submit applications for LOAs and required documentation

Check if a specific product has been approved by the regulator and its energy efficiency ratings

Web based, running on Drupal platform

5. Key benefits of the EE Database system

REGULATOR

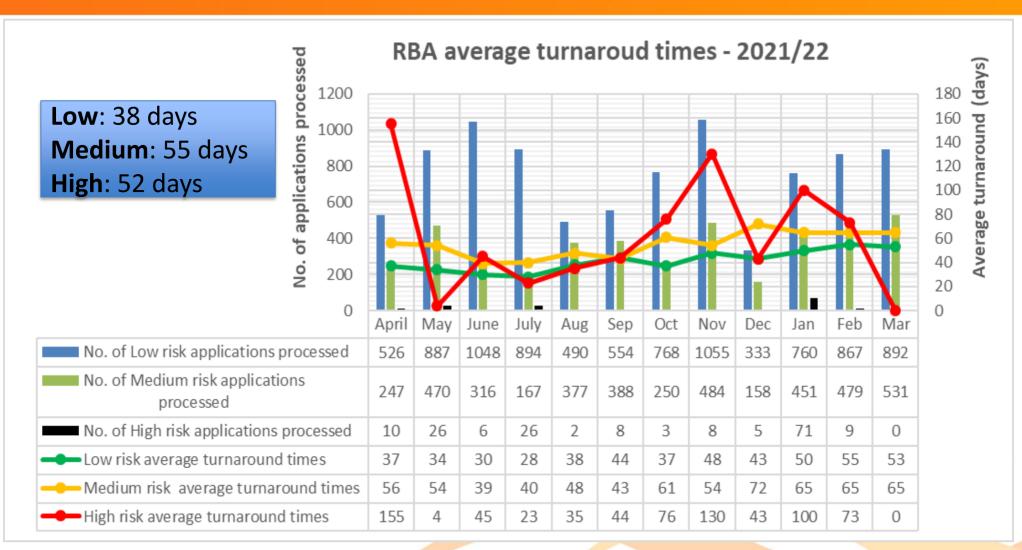

- Reduces the amount of work required of Regulator Staff
- Reduces the number of returned applications
- Reduces the turn around time for applications
- Automated email notification of any change in status
- Applications validated by the system

APPLICANTS

- Central Record of All Applications submitted through the system
- Automated notifications via email of a change in the status of
- applications (Submitted, Pending, Evaluated, Closed)
- Ability to check the status of an application at any time
- Download LOA

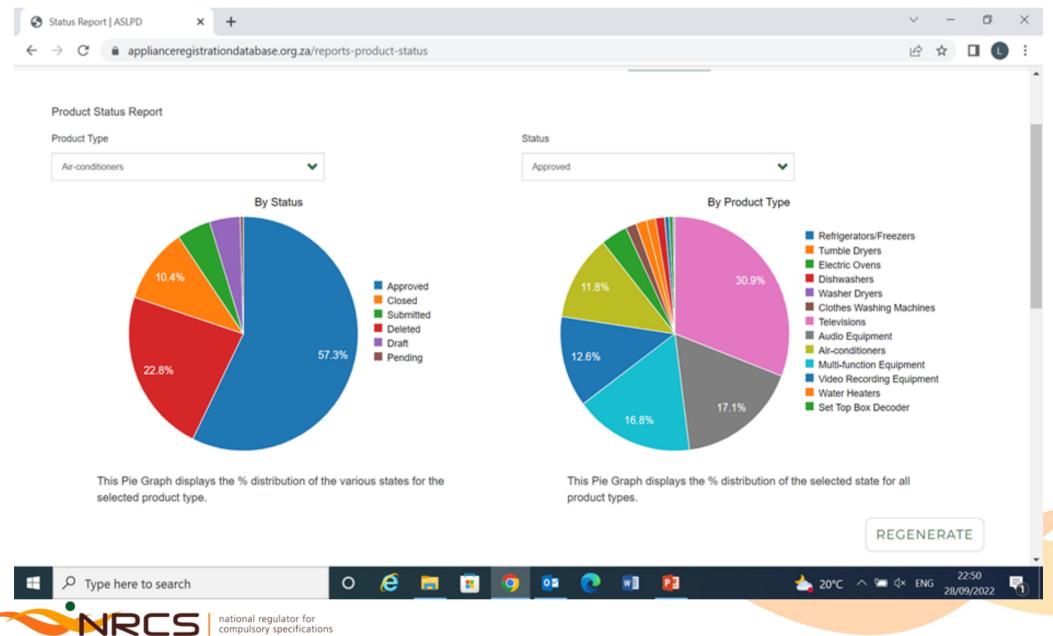

6. Practical examples: average turnaround times

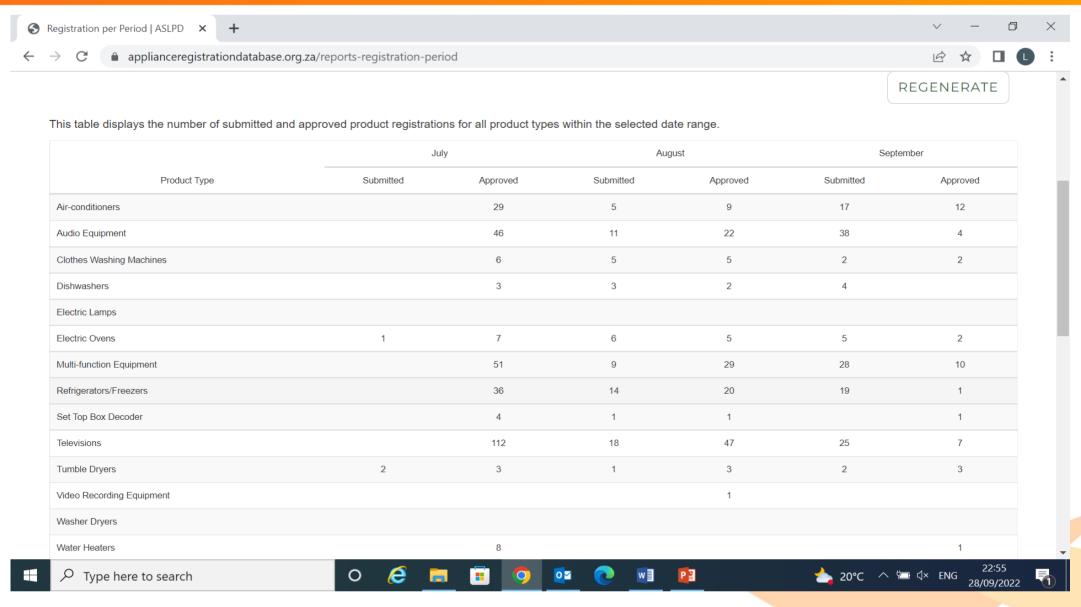

- 2016/17 average turnaround times easily exceeded 120 days
- 2017/20 –average turnaround times range: from 90 120 days (learning effect, RBA introduction
- 2020/22 average turnaround times range: 30 60 days (EE Database, RBA, ...)

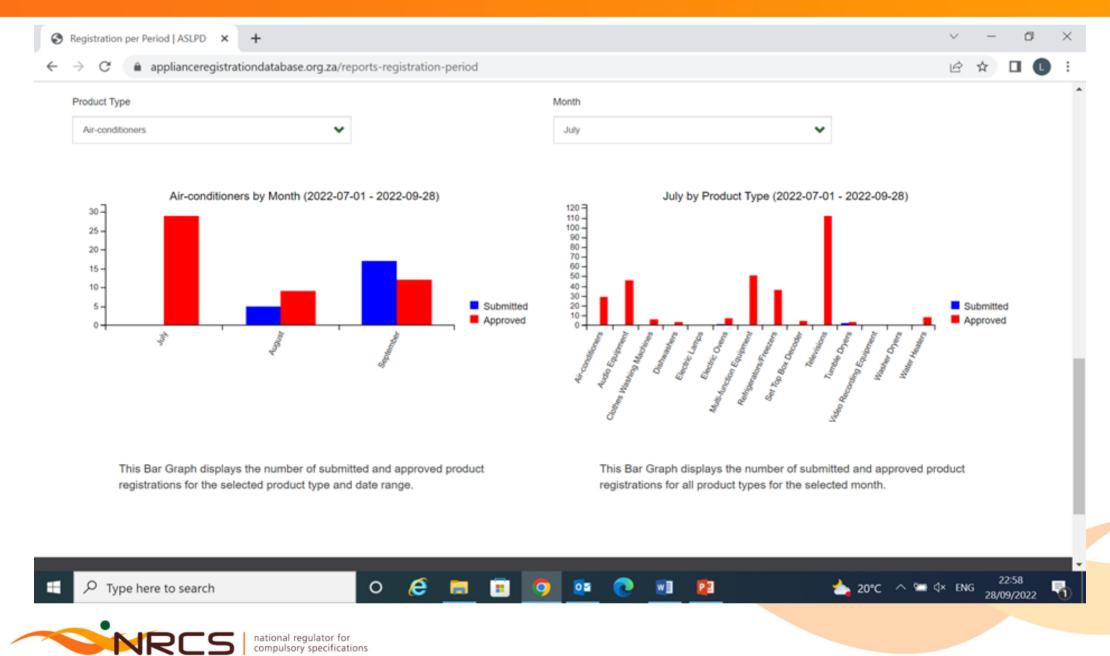

17th Annual SAEEC Conference SANEDI

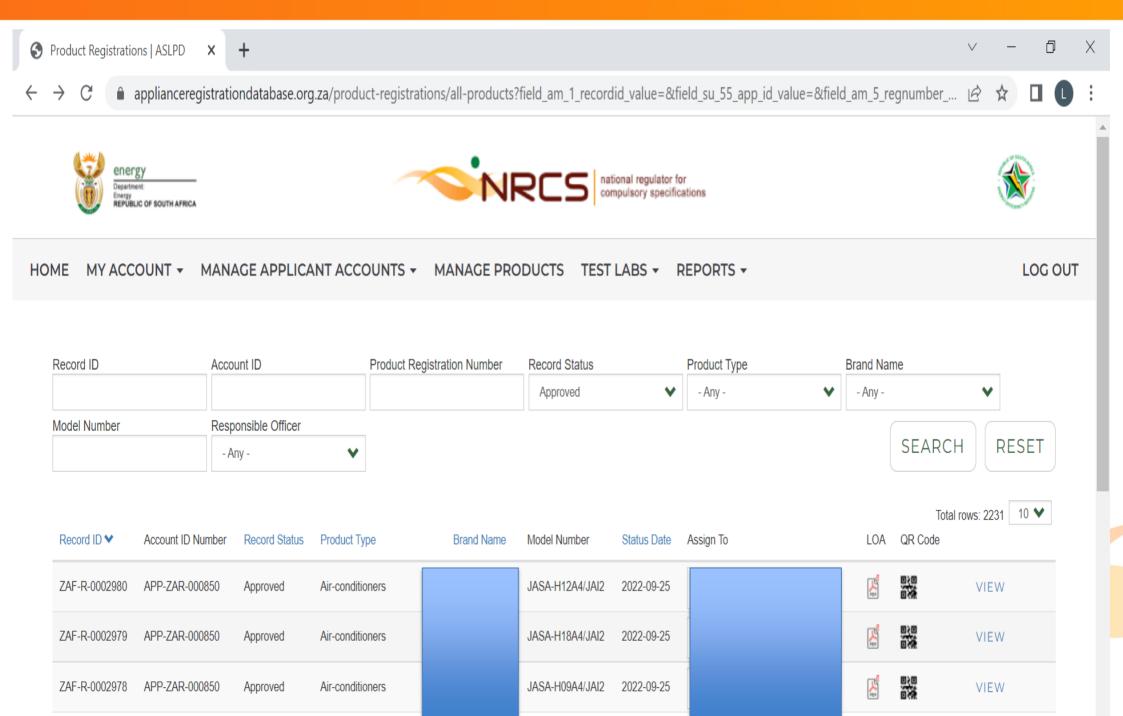

17th Annual SAEEC Conference SANEDI

17th Annual SAEEC Conference SANEDI

7. The End

THANK YOU
